The Compressor Station No. 1 on the Scratov-Yoseow gas ripe lin was about 50 km northwast of Caratov and 25 km southeast of Atkarsk, 1 to 2 km from the railroad station in Kologrivovka, Sacatov Chlast. The Compression Station, covering an area of 100 x 500 meters, had a cooling instillation, two water basins, one water tower, one compressor house, a power station, several workshops, administration buildings, garages and residential buildings. The pas tanks served for gas filtering. The pumping station, the compres or house and the power station had several suction and pressure machines, Diesel units, light machines and the necessary pressure regulators and measuring instruments. Part of the machinery was of American make. Some machines mostly the motors and generators were manufactured by Siemens. The construction of the stat on started immediately after the war. It was put into operation in December 1946.
